The Evolution -
Mother Earth Movers and Infra Pvt. Ltd.

From Mother Earth Movers and Infra to Gravita Ground Engineering

Over the years, our journey has steadily expanded technical capability, strengthened execution, deepened service offering, and built lasting market credibility. This consistent progress has enabled us to grow from specialist beginnings into a trusted, industry-leading infrastructure and ground-engineering platform.

A New Chapter

Gravita Ground Engineering Pvt. Ltd.

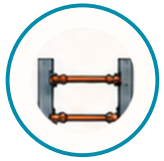

Gravita is positioned as a specialist ground-engineering company focused on deep excavation, earth retention, basement construction and ground-support works, offering a more specialised capability than generic civil contracting.

The Company

GRAVITA Ground Engineering Pvt. Ltd. has evolved from Mother Earth Movers and Infra Pvt. Ltd., carrying forward its execution expertise to deliver specialised ground engineering solutions spanning secant piling, diaphragm walls, strutting, excavation, dewatering and groundworks.

Our Focus

Specialist ground engineering with a concentrated scope in subsurface and retained-earth works.

Our Strength

Technical expertise, disciplined execution and equipment-led delivery form the core of our capability.

Our Model

Built to scale through stronger capability, visibility and larger project participation.

Our Commitment

We deliver engineered solutions that are safe, reliable and built to stand the test below and beyond.

Built Below. Engineered Beyond.

Director Profile

Mr. K. Manikandan

Director | Entrepreneurial Leadership & Operations

25+ years of entrepreneurial and operational experience across earthmoving, top-down excavation and deep excavation, infrastructure development, material supply, and construction execution, with deep expertise in Chennai's infrastructure sector.

Key Highlights

Entrepreneurial Leadership
Led MEM Infra's growth with a strong execution-led approach, expanding capabilities, project depth, and operational scale.

Operations Management
Drives site execution, manpower coordination, equipment deployment, and day-to-day delivery oversight across project types.

Infrastructure Expertise
Executed top-down and deep excavation works, including up to 28 ft excavation in a metro project and foundation works up to 40 m depth.

Business Growth
Built a trusted infrastructure platform with 100+ completed projects, 50+ equipment fleet, and long-term market credibility.

Client Relationships
Built dependable partnerships through reliable delivery, responsive coordination, and consistent client confidence.

Commitment to Excellence
Focused on quality, safety, reliability, and timely execution across excavation, foundation, and infrastructure works.

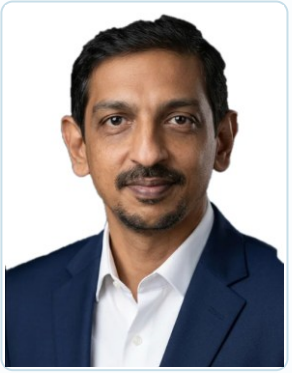

Execution Leadership • Operations Management • Deep Excavation • Foundation Works • Client Trust • Business Growth

Strategic Partners

Design Partner & Service Partner

Design Partner

Mr. C. Muthukumar

Principal Consultant / Director

Pramuth Engineers Pvt. Ltd.

CONSULTING PARTNER - GROUND ENGINEERING DESIGN

- Pramuth Engineers Pvt. Ltd. is a Consulting Partner for Engineering Design and Solutions for deep excavation support & shoring system.
- All solutions will be reviewed and vetted by IIT Madras / Equivalent Institution

Service Partner

Mr. M. P. Shakthivel

Founder / Director

Sri Thillai Kaliamman Pile Foundation

SECANT PILING & STRUTTING

- Sri Thillai Kaliamman Pile Foundation is a contracting firm specializing in Secant Piling and Strutting.
- Gravita and Sri Thillai Kaliamman have previously executed projects through joint ventures.
- The firm is now partnering with Gravita for Secant Piling and Strutting works.

Gravita USP

Core strengths that differentiate our execution capabilities

In-house Design Team

Dedicated design capability for ground engineering structures and systems.

In-house Equipment

Owned equipment base enabling better control over quality, schedules, and execution.

Contracting Firms as Existing Expertise

Established partner network and execution expertise for specialized ground engineering works.

Integrated strengths across design, equipment, and execution.

Gravita
Ground Engineering Pvt Ltd
Built Below, Engineered Beyond.

Challenging Capabilities

Navigating Complex Ground Engineering Demands

Urban Expansion

Residential, commercial and mixed-use developments are driving demand for deep excavation and basement works.

Infrastructure Growth

Transport, industrial and public projects require dependable foundations, retaining systems and ground support.

Complex Site Conditions

Dense sites, groundwater challenges and tighter footprints increase the need for specialist execution.

Specialist Market Gap

There is clear opportunity for an integrated ground-engineering company delivering coordinated specialist packages.

Gravita
Ground Engineering Pvt Ltd
Built Below, Engineered Beyond.

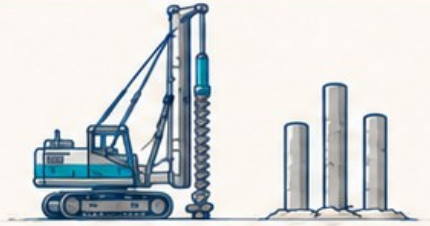

Current Asset of Mother Earth Movers and Infra Pvt. Ltd.

A coordinated capability base supporting ground engineering and site execution.

Deep Excavation and Shoring Support

Specialized support for safe deep excavation, earth retention and below-ground stability.

Foundation & Piling Works

Execution capability for piling and foundation systems that provide dependable structural support.

Road Construction & Development

Capability for internal roads, access corridors and associated civil development works.

Land Development & Grading

Site grading, leveling and land development services for efficient project readiness.

Material Supply & Transport

Reliable supply and movement of construction materials, equipment and site resources.

Site Clearing & Preparation

Pre-construction clearing and preparation works to enable smooth project commencement.

An integrated capability base supporting end-to-end ground and site execution.
